

Data Collection and Preprocessing Phase

Date	4 th July 2024
Team ID	739804
Project Title	Cost Prediction of Acquiring a Customer.
Maximum Marks	2 Marks

Data Collection Plan & Raw Data Sources Identification Template

Elevate your data strategy with the Data Collection plan and the Raw Data Sources report, ensuring meticulous data curation and integrity for informed decision-making in every analysis and decision-making endeavor.

Data Collection Plan Template

Section	Description
Project Overview	Businesses looking to maximize their marketing and sales tactics in a competitive market must be able to predict the cost of acquiring a client (CAC). In this process, the amount of money needed to turn a prospective lead into a paying client is estimated. This amount includes costs for sales, marketing, and advertising. With accurate CAC prediction, businesses may improve return on investment (ROI) by making well-informed decisions about client segmentation, pricing strategies, and budget allocation.
Data Collection Plan	<ul style="list-style-type: none"> • Search for datasets related to Customer Acquisition Cost. • Prioritize datasets with diverse demographic information.
Raw Data Sources Identified	The raw data sources for this project include datasets obtained from Kaggle & UCI, the popular platforms for data science competitions

	and repositories. The provided sample data represents a subset of the collected information.
